Notes about our price list and our service:-

This price list represents the range of equipment that we normally carry in stock. Each manufacturer and importer that we deal with has a wide range of machinery that will not all be listed here so if you cannot see a machine to suit you then please contact us and we will do our utmost to help you.

We aim to provide a wide range of equipment offering good value for money at all times and with an emphasis on the better quality end of the market.

All machines that we supply will normally be fully assembled and where appropriate fuelled & oiled ready to use!

Most machines can be delivered free of charge within our local area.

We offer a **Half Price Service** on any new machines sold during the year provided that they are booked in for service during November or December which is our winter servicing period.

We provide a high quality parts and service backup for all machines that we sell.

In the event of a machine failure during the warranty period, we will give absolute priority to the repair, often providing an immediate or same-day service.

All prices quoted are inclusive of VAT at 15%

The specifications in this price list are intended as a means of comparing products within our product range. They are subject to change without notice and although we do our utmost to ensure that they are correct it is advisable to contact us to confirm exact current specifications and prices prior to purchase.

If you do find the same machinery advertised locally or nationally at a lower price then please contact us as we will always attempt to match competitors for local business.

We do not supply machines beyond our normal local delivery area (max 30 miles) as we believe that this equipment requires regular maintenance and ready availability of spare parts. There are already too many people selling equipment via the internet, and indeed from larger stores where there is no provision for future servicing or even warranty backup by them. Although warranty cover is provided by the manufacturer the actual warranty repair is usually carried out by specialist dealers such as ourselves and our priority is always to look after our own customers as they are where our future lies. **Many manufacturers are now insisting that warranty should be provided by the original seller so claims that national service networks are available may be misleading.**

BRUSHCUTTERS & TRIMMERS

Castel XR25J		CG XR25J	£97.50	
Light duty trimmer with 25cc full crank engine and split shaft for easy storage. Previously sold as Mountfield MT25J

Prices for the 2009 season were set for our pre-season orders in September / October 2008 and were generally substantially higher than the 2008 prices. In most years these prices remain the same for the duration of the year.

Due to the fact that most of the products we sell are imported and the ongoing weakening of the pound against other currencies, most importers have increased their prices still further this year.

The prices listed here are the current trading prices and in many cases, as long as we have pre-season stock and indeed some 2008 stock we can sell at even lower prices.

Please contact us for details.
