Notes about our price list and our service:-

This price list represents the range of equipment that we normally carry in stock. Each manufacturer and importer that we deal with has a wide range of machinery that will not all be listed here so if you cannot see a machine to suit you then please contact us and we will do our utmost to help you.

We aim to provide a wide range of equipment offering good value for money at all times and with an emphasis on the better quality end of the market.

All machines that we supply will normally be fully assembled and where appropriate fuelled & oiled ready to use!

Most machines can be delivered free of charge within our local area.

We offer a **Half Price Service** on any new machines sold during the year provided that they are booked in for service during November or December which is our winter servicing period.

We provide a high quality parts and service backup for all machines that we sell.

In the event of a machine failure during the warranty period, we will give absolute priority to the repair, often providing an immediate or same-day service.

All prices quoted are inclusive of VAT at 15%

The specifications in this price list are intended as a means of comparing products within our product range. They are subject to change without notice and although we do our utmost to ensure that they are correct it is advisable to contact us to confirm exact current specifications and prices prior to purchase.

If you do find the same machinery advertised locally or nationally at a lower price then please contact us as we will always attempt to match competitors for local business.

We do not supply machines beyond our normal local delivery area (max 30 miles) as we believe that this equipment requires regular maintenance and ready availability of spare parts. There are already too many people selling equipment via the internet, and indeed from larger stores where there is no provision for future servicing or even warranty backup by them. Although warranty cover is provided by the manufacturer the actual warranty repair is usually carried out by specialist dealers such as ourselves and our priority is always to look after our own customers as they are where our future lies. **Many manufacturers are now insisting that warranty should be provided by the original seller so claims that national service networks are available may be misleading.**

| 37. | Cub Cadet - AllRounder | £3599.00 | <i>rrp £3999.00</i> |
| | Revolutionary new tractor mower with 23hp Kohler V-Twin engine 127cm cut with Zero-Turn capability. Twin hydrostatic transmission and special steering linkage allows this machine to spin round on its rear axle. Other Zero-Turn machines achieve this by using two steering levers, requiring a lot of operator skill but this machine uses a standard steering wheel making it as easy to use as a standard tractor. Other benefits of the system are improved traction on slopes and the rear wheels are wider spaced than standard tractors (106cm to outside of rear wheels) making it more stable. The cuttings can be side discharged or mulched. | | |

FRONT CUT RIDE-ON MOWERS

The Mountfield and Stiga front decked machines are produced in the same factory but branded and painted differently. We can supply either brand but only stock the Stiga versions. Prices for equivalent specs are identical. There is a range of 16 different tractor units with a choice of cutting deck for each model. This gives an extremely wide choice of over 50 combinations which we can't list here but range in price from £1399 to £8049.

The front mounted cutter decks allow cutting into corners and under obstacles where mid-mounted decks could not reach. Mulching decks are quieter in operation than grass collecting machines and cutting time is greatly reduced as there is no need to stop for trips to the grass tip. Mulching is only suitable where regular cutting is possible however. For 2009 all decks are "Combi" which will mulch for regular cutting or rear discharge if the grass is longer. For very long grass (up to 1 metre) a flail mower can be fitted.

- 1. Stiga Primo** £1359.00 *rrp £1649.00*

Tractor mower with 12.5hp Stiga engine. 3 forward gears & reverse. 78cm **front mounted**, multiclip deck. Rear wheel steering for easy access into awkward areas.
