## Notes about our price list and our service:-

This price list represents the range of equipment that we normally carry in stock. Each manufacturer and importer that we deal with has a wide range of machinery that will not all be listed here so if you cannot see a machine to suit you then please contact us and we will do our utmost to help you.

We aim to provide a wide range of equipment offering good value for money at all times and with an emphasis on the better quality end of the market.

All machines that we supply will normally be fully assembled and where appropriate fuelled & oiled ready to use!

Most machines can be delivered free of charge within our local area.

We offer a **Half Price Service** on any new machines sold during the year provided that they are booked in for service during November or December which is our winter servicing period.

We provide a high quality parts and service backup for all machines that we sell.

In the event of a machine failure during the warranty period, we will give absolute priority to the repair, often providing an immediate or same-day service.

All prices quoted are inclusive of VAT at 20%

The specifications in this price list are intended as a means of comparing products within our product range. They are subject to change without notice and although we do our utmost to ensure that they are correct it is advisable to contact us to confirm exact current specifications and prices prior to purchase.

## Price Promise

**If you do find the same machinery advertised locally or nationally at a lower price then please contact us as we will always attempt to match competitors for local business.**

**We do not supply machines beyond our normal local delivery area (max 30 miles)** as we believe that this equipment requires regular maintenance and ready availability of spare parts. There are already too many people selling equipment via the internet, and indeed from larger stores where there is no provision for future servicing or even warranty backup by them. Although warranty cover is provided by the manufacturer the actual warranty repair is usually carried out by specialist dealers such as ourselves and our priority is always to look after our own customers as they are where our future lies. **Many manufacturers are now insisting that warranty should be provided by the original seller so claims that national service networks are available may be misleading.**

# Robot Mowers

The robotic mowers, once installed, will automatically cut your lawn to a pre-programmed schedule. They generally need to be programmed to cut for a few hours daily and most models are powered by Lithium Ion batteries. The mower senses when the battery power is low and automatically returns to its charging base for a re-charge before setting out again.

As the grass is being cut on such a regular basis, the cuttings are very fine so will quickly decompose and be absorbed back into the lawn as a natural fertiliser. This daily cutting also means that the grass always has a tidy appearance instead of the nicely "Just Cut" look at the weekend and the "I Badly Need Cutting" look a fortnight later.

We have a working machine available to view on our small lawn area.

Installation is fairly straightforward for anyone with reasonable DIY skills but can be performed by a Robomow approved technician at prices from £299.00 if required.

<b>Robomow RX12u</b>	£499.00	<i>rrp £599.00</i>
----------------------	---------	--------------------

This is the smallest and most basic machine in the Robomow range and is recommended for areas up to 150 square meters. Under perfect conditions it may cut up to 250square meters. This machine requires manual starting.

<b>Robomow RX20u</b>	£699.00	<i>rrp £849.00</i>
----------------------	---------	--------------------

The same frame as the RX12u but programmable for fully automated cutting and is recommended for areas up to 200 square meters. Under perfect conditions it may cut up to 300 square meters.

<b>Robomow RC304u</b>	£999.00	<i>rrp £1199.00</i>
-----------------------	---------	---------------------

The RC models are the middle range of Robomow. This model is programmable for fully automated cutting and is recommended for areas up to 500 square meters. Under perfect conditions it may cut up to 1000 square meters. This machine requires manual starting.

<b>Robomow RC308u</b>	£1249.00	<i>rrp £1499.00</i>
-----------------------	----------	---------------------

The same basic machine as the RC304u but higher capacity battery and more hardware for larger lawn areas. Recommended for areas up to 800 square meters. Under perfect conditions it may cut up to 1500 square meters.

<b>Robomow RC312 Pro SX</b>	£1649.00	<i>rrp £1999.00</i>
-----------------------------	----------	---------------------

Top of the RC range with brushless motor for larger workload and supplied with Robohome for increased protection when not in use. Recommended for areas up to 1200 square meters. Under perfect conditions it may cut up to 2000 square meters.
